Overall Rating

852 responses

- Excellent
- Good
- Average
- Below Average
- Very very poor

The overall rating given by the students on the curriculum is good by 57% of the students. 20% of them rated it as average. Whereas 19% of them rated it as excellent. Minority of the students mentioned it as below average.

Suggestions from Students :

Students suggested that the curriculum should be more practical and analytical. It should include real time cases and field visit. Courses like business analytics should be more practical and application based rather than theory. Some of the other suggestions given by the students were to include real-life case studies, class group discussions. There should be more focus on live projects.

An important suggestion came in the form of having a counsellor appointed at college level with whom students can discuss their personal matters and seek guidance. Also inclusion of sports period in the time table was suggested for improved fitness level. Career guidance should be provided at various levels. Also quite a few students suggested that internal exam should be reduced to 1 and fewer CES should be conducted. BCA course should focus more on DATA STRUCTURE ALGORITHM and MERN stack software development.
